

SALMAN ALSAYAB

Data Enthusiast

 SalmanSiy2002@outlook.com |  +966 54 726 7041 |  [LinkedIn](#)

Summary

Data, AI and Machine Learning enthusiast with a strong foundation in computer science, data analysis, and applied machine learning. Experienced in data cleaning, analysis, visualization, and building automation tools to support data-driven decision-making. Skilled at communicating insights to non-technical stakeholders, with hands-on industry and academic experience.

Education

Bachelor of Science in Computer Science | King Fahd University of Petroleum & Minerals (KFUPM) | **Jan 2020 - Mar 2025**

Work Experience

Business Analyst | Binzagr Company | Jun 2024 – Aug 2024

Cleaned and prepared company data for analysis and visualization. - Analyzed key business data to support data-backed decision-making. - Reported insights to non-technical senior stakeholders. - Built automation tools to load and integrate external data into company databases.

Certifications & Courses

- **Supervised Machine Learning: Regression and Classification** | Stanford University & DeepLearning.AI | 2025
-

Projects

Property cost prediction model:

- A full fledged machine learning model that can predict the prices of properties in Saudi Arabia by inputting relevant information about the property Ex: Location, Area, type, and etc leveraging data personally mined from relevant vendors using selenium then cleaned and analyzed using pandas and matplotlib. Resulting in clean and useful data to fuel the LGBM prediction model.

ETL pipeline

- **Built a full ETL pipeline starting from building the SQL databases that will store the data, then extracting the data from their sources using the respective apis. Transforming the data was done using python, lastly loading the data to the SQL database**

Skills

Technical Skills | Python, Java, SQL, ETL, Power BI, Tableau, Machine Learning, Natural Language Processing, GitHub, AWS, Microsoft Teams, Data Cleaning, Model Evaluation, Jupyter Notebook, Advanced Excel, Databases, Exploratory Analysis, Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Professional Skills | Data Analysis, Technical Support, Digital Marketing, Report Writing, Project Presentation, Task Management, Model Testing, Solution Development, Presentation Preparation, Technical Documentation, Team Coordination, Analytical Writing, Operational Follow-up, Applied Research

Soft Skills | Analytical Thinking, Teamwork, Discipline, Flexibility, Time Management, Problem Solving, Initiative, Effective Communication, Organization, Self-Control, Work Under Pressure, Willingness to Learn, Adaptability, Attention to Detail, Focus

Languages

- **English**
- **Arabic**
